# FAQ

BLUETOOTH PAIRING

To connect the scanner to a pc/tablet/mobile phone directly via Bluetooth, please read the programming bar codes and follow the instructions here below.

Factory Default

³ $ P , A E , P

Wait 30 seconds, then proceed with reading the following bar codes.

Unlink

³ U n l n k

Enable Variable PIN

³ $ P , C B T H P 0 1 , P

Link HID

³ L n k H i d

The scanner will be visible for 5 minutes.

Use the Bluetooth of the computer/tablet/mobile device to find and connect the scanner.

Select the product you would like to pair with your PC (default name is "Datalogic Scanner").

A pop-up will the appear and you will need to insert a PIN code to enable connection.

Use the bar codes here below to insert the PIN code and then complete the procedure by reading the code **"Exit Var PIN"**.

N.B.
The PIN code will only appear if the scanner is connected to iOS devices.
For Windows devices, the PIN code is: 1234
