FRAME MOUNTING ADAPTER KIT
INSTRUCTION MANUAL

For Bosch Frames

CBX Connection Boxes or SC Controllers

1. Assemble the hammer-head nuts and hex head countersunk screws to form the two bolts and insert them behind the CBX or SC.

2. Place the assembly onto the Bosch profile so that the bolts enter the profile channel and then rotate the bolts **clockwise** 90° so that they lock into place.

3. Install the two small diameter flat washers and fasten the two self-locking nuts until tight.
2 hammer-head nuts
2 hex head countersunk screws M4 x 50 mm
2 flat washers 4.3 x 12 mm
2 self-locking nuts

90°

QL Quick Link Series

1. Assemble the hammer-head nuts and hex head countersunk screws to form the two bolts.

2. Place the two large diameter flat washers onto the two bolts and then insert them behind the QL.

3. Place the assembly onto the Bosch profile so that the bolts enter the profile channel and then rotate the bolts **clockwise** 90° so that they lock into place.

4. Install the two small diameter flat washers and fasten the two self-locking nuts until tight.

2 hammer-head nuts
2 hex head countersunk screws M4 x 50 mm
2 flat washers ø4 x ø18 mm
2 flat washers 4.3 x 12 mm
2 self-locking nuts
90°

For 80/20 Frames
CBX Connection Boxes or SC Controllers

1. Insert the screws, locking washers and small flat washers through the connection box as shown in the figure and thread them loosely into the Drop-In T-nuts.

From the separate bag:
2 Phillips head screws M4 x 40 mm
2 M4 locking washers
2 flat washers 4.3 x 12 mm
2 Drop-In T nuts

2. Insert the entire assembly onto the 80/20 profile so that the Drop-In T-nuts fit into the profile channel. Tighten the screws. The Drop-In T-nuts will lock into place when tightened.
