INSTALLATION PROCEDURE

- Physically mount the Matrix 320 reader.
- Make the necessary electrical connections.
- Configure the reader using the X-PRESS interface (simple configuration) or the DL.CODE software configuration program (complete configuration).

HMI X-PRESS™ INTERFACE

In normal operating mode the colors and meaning of the five LEDs are illustrated in the following table:

READY (green)	indicates the device is ready to operate.
GOOD (green)	confirms successful reading.
TRIGGER (yellow)	indicates the status of the reading phase.
COM (yellow)	indicates active communication on main serial port.
STATUS (red)	indicates NO READ result.

During the reader startup (reset or restart phase), all the LEDs blink for one second.

HMI X-PRESS™

The single push button gives immediate access to the following relevant functions:

- Test Mode with bar graph visualization to check static reading performance.
- Aim/Autofocus turns on the laser LED to aim the reader at the target. The target should be placed 16 mm (14 LEDs model) or 30 mm (36 LEDs model) upwards and centered horizontally with respect to the aiming pattern (cross).
- Setup to self-optimize and auto-configure photometry parameters.
- Learn to self-detect and auto-configure for reading an unknown barcode (by type and length). Only one symbology can be saved using this method. Performing Autolearn on a second symbology will overwrite the first one.

COMPLIANCE

General

For installation, use and maintenance it is not necessary to open the reader. Only connect Ethernet and dataport connections to a network which has routing only within the plant or building and no routing outside the plant or building.

Power Supply

ATTENTION: READ THIS INFORMATION BEFORE INSTALLING THE PRODUCT

The unit is intended to be powered by an external power supply ES1, PS2 according to IEC 62368-1:2014.

EMC Compliance

In order to meet the EMC requirements:

- connect reader chassis to the plant earth ground by means of a flat copper braid shorter than 100 mm;
- for CBX connections, connect pin "Earth" to a good Earth Ground;
- for direct connections, connect your cable shield to the locking ring nut of the connector.

CE Compliance

CE marking states the compliance of the product with essential requirements listed in the applicable European directive. Since the directives and applicable standards are subject to continuous updates, and since Datalogic promptly adopts these updates, therefore the EU declaration of conformity is a living document. The EU declaration of conformity is available for competent authorities and customers through Datalogic commercial reference contacts. Since April 20th, 2016 the main European directives applicable to Datalogic products require inclusion of an adequate analysis and assessment of the risk(s). This evaluation was carried out in relation to the applicable points of the standards listed in the Declaration of Conformity. Datalogic products are mainly designed for integration purposes into more complex systems. For this reason it is under the responsibility of the system integrator to do a new risk assessment regarding the final installation.

Warning: this is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

LED Safety

For all Datalogic Matrix 320 compatible internal illuminators, LED emission is classified into Risk Group 1 according to EN 62471:2010.

Laser Safety

This product conforms to the applicable requirements of IEC 60825-1 and complies with 21 CFR 1040.10 except for deviations pursuant to Laser Notice N° 56, date May 8, 2019. This product is classified as a Class 2 laser product according to IEC 60825-1 regulations.

CAUTION: Use of controls or adjustments or performance of procedures other than those specified herein may result in exposure to hazardous visible laser light.

Disconnect the power supply when opening the device during maintenance or installation to avoid exposure to hazardous laser light. The laser beam can be switched on or off through a software command.

The following warning label content is applied to each of the laser equipped products indicated on the opposite page.

Produit(s) conforme selon 21CFR 1040.10 sauf des dérogations relatives à la Laser Notice N° 56, data Mai 8, 2019.

Dans le paquet il y a l'étiquette(s) pour les pays où le texte d'avertissement en français est obligatoire. Le(s) mettre sur le produit à la place de la version anglaise.
