Shield Security Releases – Google Security Patches End Date Table

OS Version	Google Security Support End Date	Devices
Android 8	Oct 31, 2021	Memor 10, Memor 1, Joya Touch A6
Android 9	Jan 31, 2022	Memor 10, Memor 20
Android 10	Feb 28, 2023	Skorpio X5, Memor 10
Android 11	Feb 29, 2024	Skorpio 5, Joya Touch 22, Memor 11
Android 13	Jan 31, 2026	Skorpio X5, Memor 20 (Wifi Only), Joya Touch 22, Memor 11, Memor 30/30X, Memor 35/35X, Memor 12/17
Android 15	Feb 29, 2028	Memor 30/30X, Memor 35/35X

NOTE: The table above reflects the end dates for security patches as announced by Google. After these dates, if the device is still under Shield Terms & Conditions (T&C), Datalogic will review potential security risks and assess the possibility of backporting and releasing updates for the latest Android version on the device. Please be aware that this process is dependent on several factors, including technical feasibility, platform constraints, and vendor support. While we will evaluate the situation carefully, there may be limitations on the extent to which security updates can be provided after Google's support ends.

The estimated termination dates for Security Patch support under Shield T&C are outlined in the following table. These dates are subject to change based on various factors, including vendor support and the practicality of applying security patches.

Device	Estimated Termination for Security Patches Support
Memor 1	March 2024 - Expired
Memor 10	August 2025
Memor 11	November 2028
Memor 20	June 2026
Memor 30/30X	January 2034
Memor 35/35X	January 2034
Memor 12	January 2033
Memor 17	January 2033
Skorpio X5	April 2029
Joya Touch A6	June 2025
Joya Touch 22	November 2028
